

Adding data in to Splunk enterprise

Note: Download Splunk enterprise from official site by creating account and then login into web.

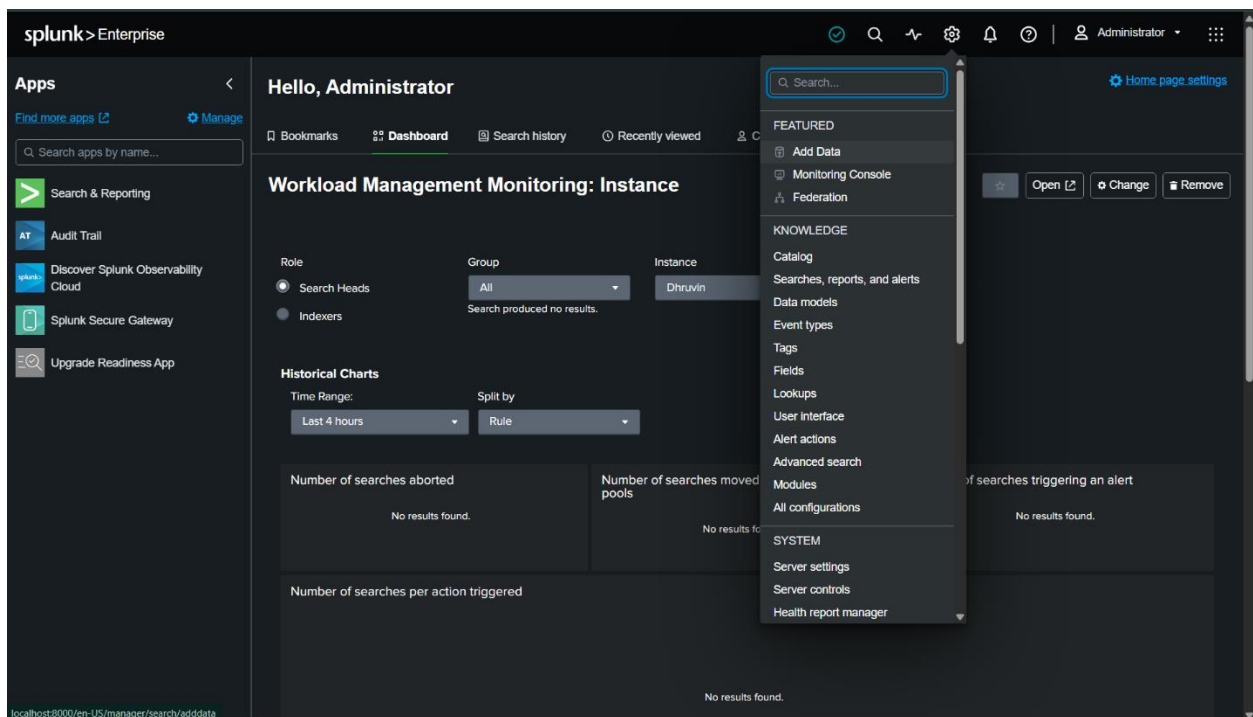

Step 1: login to Splunk

Now you're looking at main interface of Splunk after login.

Step 2: Go to setting and click Add data option.

Step 3: Now select upload from device option and add the logs data file.(We can create new index but for now I'm using main index) then follow the process at last click submit.

The screenshot shows the 'Add Data' wizard in the Splunk Enterprise interface. The top navigation bar includes the 'splunk>enterprise' logo, 'Apps' dropdown, and user menu with 'Administrator', 'Messages', 'Settings', 'Activity', 'Help', and a 'Find' search bar. The wizard progress bar shows five steps: 'Select Source' (active), 'Set Source Type', 'Input Settings', 'Review', and 'Done'. Navigation buttons '< Back' and 'Next >' are present. The main content area is titled 'Select Source' and instructs the user to 'Choose a file to upload to the Splunk platform, either by browsing your computer or by dropping a file into the target box below.' It shows 'Selected File: No file selected' and a 'Select File' button. A large dashed box is labeled 'Drop your data file here' with a note 'The maximum file upload size is 500 Mb'. An 'FAQ' section at the bottom lists three questions: 'What kinds of files can the Splunk platform index?', 'What is a source?', and 'How do I get remote data onto my Splunk platform instance?'.

Select Source

Choose a file to upload to the Splunk platform, either by browsing your computer or by dropping a file into the target box below. [Learn More](#)

Selected File: **No file selected**

Select File

Drop your data file here

The maximum file upload size is 500 Mb

FAQ

- > What kinds of files can the Splunk platform index?
- > What is a source?
- > How do I get remote data onto my Splunk platform instance?

Go to the Search & Reporting option and search “index=main” You will see that the log data has been successfully added into Splunk Enterprise.

The screenshot displays the Splunk Search & Reporting interface. The search bar at the top contains the query "index=main". Below the search bar, the results are summarized as "991 events (5/24/26 4:30:00.000 PM to 5/25/26 5:04:12.000 PM)". The interface is divided into several sections:

- Left Sidebar:** Contains navigation options like Search, Analytics, Datasets, Reports, Alerts, Dashboards, and Modules.
- Search Bar:** Displays the query "index=main" and the time range "Last 24 hours".
- Results Summary:** Shows "991 events" and a "No Event Sampling" dropdown.
- Visualization:** A timeline view showing a single green bar representing the data range.
- Fields List:** A sidebar on the left of the table view showing "SELECTED FIELDS" (host, source, sourcetype) and "INTERESTING FIELDS" (date, time, status, etc.).
- Table View:** A table with columns "Time" and "Event" showing individual log entries. The first few entries are:

Time	Event
5/25/26 10:52:48.000 AM	2026-05-25 10:52:48 EventCode=4624 user=finance src_ip=192.168.1.50 status=success host = Dhruvin source = bruteforce_soc_lab_1000.log sourcetype = logs
